Tools of the Trade demo: Water Jet Well Cleaning
(1/2 hour morning demonstration on water jet well cleaning)

Takeaways: As a result of this workshop, you will have

- made contacts with groundwater professionals who can offer assistance with future problems or opportunities,
- learned about a new tool in the well rehab and well development arenas that uses water at up to 20,000psi at 32gpm in a self rotating tool

Tools Topics:

- Overview of a new tool in the well rehab and well development that uses water at up to 20,000psi at 32gpm in our self rotating tool.
- Use of water-jetting with correct pressure and flow to open up perforations and stimulate gravel packs.
- Use of water-jetting to easily accomplish removal of drill mud in the development of a new well.
- Use of water-jetting to effectively clean stainless, regular steel and even PVC perforated pipe.

Instructor:

Paul Phelps, General Manager, Hydro Pressure Corp., Camarillo, CA

Mr. Phelps has 30 years experience in development and use of water jetting equipment in a variety of industrial applications. Hydro Pressure Corp. holds a C-61/D38 (sand & water blasting) and a C-21 (building moving, demolition) CA Contractor's licenses.
