

## *Safe Water CD-ROM*

*Safe Water*, an educational CD-ROM that helps students learn about groundwater characteristics and properties, geology and hydrology, contamination sources, and groundwater protection uses video footage from CGA's video, *Groundwater - Our Reservoir of Strength*.

Tom Snyder Productions, in coordination with the American Museum of Natural History, produced the CD-ROM. *Safe Water* is the second of three titles in the Science Seekers project. For more info on the project, contact Tom Snyder Productions at [www.teachtsp.com](http://www.teachtsp.com).

CGA's video footage in *Safe Water* includes scenes of groundwater investigations, well testing and pump installation. CGA also supplied footage for another video, *Water Well Basics* produced by the American Ground Water Trust.
